

It's your data. Do your employees know how to protect it?

Do your employees know:

- How to Identify phishing emails and websites
- Not to send PII (SSN, credit card, driver's license, etc.) in emails
- How to protect portable media
- The importance of creating strong passwords
- Not to share their passwords
- The dangers of posting PII on social media
- About the risks of using their personal devices with company data

Common sense, right? You'll be surprised how many employees don't know or practice these simple procedures.

Our Training Program can help you get your employees trained and educated on how to protect your data.
